SDS SERIES DC SUBMERSIBLE PUMPS

D-Series (Duplex)

3.8" (96mm) O.D.
10.75" (273mm) Ht.
14 lbs. (6.4kg) Wt.

Suitable for installation in 4" (100mm) inside diameter and larger wells.

Flow rates up to 2 GPM (7.5 LPM), and heads up to 230 feet (70.1 meters).

(See chart on back)

SunPumps SDS series submersible pumps are highly efficient, low voltage, DC powered, diaphragm type positive displacement pumps designed specifically for water delivery in remote locations.

They operate on 12 to 30 volts of DC current that may be supplied from a variety of independent power sources including solar panels, wind generators, batteries or any combination of the three. Power requirements can be as little as 35 watts.

Constructed of 316 and 304 stainless steel or all 316 stainless steel, these pumps are the highest quality submersible pumps in their on the market.

Q-Series (Quad)

4.5" (114mm) O.D.
12.25" (311mm) Ht.
17.5 lbs. (7.9kg) Wt.

Suitable for installation in 5" (127mm) inside diameter and larger wells.

Flow rates up to 5 GPM (19 LPM), and heads up to 100 feet (30 meters).

(See chart on back)

SunPumps SDS series pumps can be installed below the water level in a pond, river or cistern, or installed by hand into a ground water well. They can be used to fill an open tank or in a pressurized water delivery system.

Simplicity is the key feature of the SDS series pumps. They are easy to install, require very little maintenance and are repairable.

SunPumps SDS series pumps are designed for use in stand alone water delivery systems. They are pollution-free, corrosion-free, self-lubricating and quiet. It is the ideal way to provide water for remote homes, campsites, livestock, small farms or for many other needs beyond the commercial power grid.
